📍 Dubai, UAE

Professional Summary

Senior Android Developer & Team Lead with 9+ years of experience building scalable, secure, and high-performance mobile applications across fintech, blockchain, e-commerce, and ride-hailing domains. Specialized in Kotlin, Java, MVVM, Clean Architecture, SOLID principles, Coroutines, Flow, and modern Android Jetpack components. Experienced in leading Agile Android teams, architecting enterprise-grade applications, conducting code reviews, and implementing CI/CD pipelines. Proven expertise in crypto wallet development, multi-chain integrations, secure transaction handling, real-time systems, and performance optimization. Focused on scalable Android architecture, security-first development, and performance optimization for fintech and blockchain applications.

Technical Skills

Languages: Kotlin, Java, Dart

Architecture: MVVM, MVP, Clean Architecture, Modularisation, SOLID Principles

UI: Jetpack Compose, XML, Material Design

Jetpack: Room, ViewModel, WorkManager, Navigation, Paging

Async: Kotlin Coroutines, Flow, RxJava, Structured Concurrency

Networking: Retrofit, OkHttp, RESTful APIs, JSON, Socket.IO

Testing: JUnit, Espresso, Mockito, Test-Driven Development

Dependency Injection: Dagger, Hilt

CI/CD: GitHub Actions, Jenkins, Firebase App Distribution

Build & Release: Gradle, ProGuard/R8, Google Play Console

Tools & VCS: Android Studio, Git, GitHub, Bitbucket, Firebase

Device: Location services, Background services, Push notifications, Localization

Security: AES/RSA encryption, Android Keystore, EncryptedSharedPreferences, secure key management, encrypted API communication

Practices: Agile/Scrum, Code Review, Cross-functional Collaboration

Professional Experience

Token 13 Software LLC

May 2025 – Present

Senior Android Developer / Team Lead

Dubai, UAE

- Lead a team of 3 Android developers in building a multi-chain crypto wallet integrated with Token13's blockchain platform, owning architecture decisions and clean coding standards.
- Enforced MVVM and Clean Architecture through structured code reviews, improving code quality, testability, and long-term maintainability.
- Engineered core blockchain features including wallet creation, transaction handling, and multi-chain support for a seamless, secure user experience.
- Collaborated with backend and QA teams to reduce release blockers and improve production stability.

Tech Carrot FZ LLC

Feb 2022 – Oct 2024

Senior Android Developer

Dubai, UAE

- Built and maintained e-commerce Android apps for global clients including Marks & Spencer and Toys "R" Us.
- Improved app stability to a 99% crash-free rate by diagnosing and resolving critical defects and memory leaks.
- Implemented mobile security best practices: secure local storage, encrypted API communication, and robust authentication to mitigate common vulnerabilities.
- Managed Google Play Store releases and staged rollouts, sustaining high user ratings across markets.
- Partnered with UI/UX designers to deliver intuitive, accessible, and visually consistent features.

ZIRO Ride LLC

Dec 2018 – Dec 2021

Senior Android Developer

Dubai, UAE

- Developed ride-hailing apps with advanced features including a payment SDK, AR navigation, and live video streaming.
- Implemented location and background services with Socket.IO to deliver real-time ride tracking and updates.
- Applied MVVM with Clean Architecture to produce maintainable, testable, and scalable code.
- Coordinated with backend and iOS teams to ensure cross-platform consistency and release stability.

Cloudium Software

Feb 2017 – Oct 2018

Associate Software Engineer

India

- Developed native Android applications in Java with a focus on performance, debugging, and stability.
- Integrated Firebase for analytics, crash reporting, and push notifications.
- Coordinated with the team across system design, integration, development, and deployment.

Feathersoft Info Solutions

Aug 2015 – Feb 2017

Software Engineer

India

- Built Android applications from concept to release, including third-party SDK integrations.
- Supported a modular architecture redesign that improved application maintainability.

Notable Projects

TokenB | *Kotlin, Coroutines, Hilt, Room, Retrofit*

Google Play

- Developed a secure multi-chain wallet supporting cross-chain swaps and real-time blockchain updates using Kotlin Coroutines for asynchronous operations.
- Implemented Clean Architecture (MVVM) with Room, Hilt, and Retrofit for scalability and enterprise-grade code quality.
- Secured private keys and transaction data with AES/RSA encryption, Android Keystore-backed key storage, and encrypted API communication.
- Led the Android team through code reviews and mentoring while optimizing API orchestration and synchronization with backend engineers.

Marks & Spencer | *Kotlin, Room, Retrofit, Coroutines, Flutter*

Google Play

- Contributed to an e-commerce app featuring real-time inventory updates and personalized recommendations.
- Used Kotlin, Room, Retrofit, and Coroutines for backend data synchronization and a seamless user experience.
- Assisted in migrating the legacy native Kotlin app to Flutter in close collaboration with cross-functional teams.

Newsreels | *Kotlin, ExoPlayer, Paging Library, Flow*

- Built a news aggregator that condenses articles into short, video-based formats for efficient consumption.
- Implemented ExoPlayer for smooth video playback and the Paging Library for efficient content loading.
- Leveraged Kotlin Flow for real-time data updates and efficient state handling.

Education

College of Engineering Chengannur

2009 – 2013

B.Tech in Computer Science and Engineering

India
